

MULTIPLE SCLEROSIS TREATMENT ALGORITHM

Date: 8 th March 2024

Venue: Hotel Zonar, Zagreb, Croatia

Note: Free participation

Dear colleagues and friends,

We are pleased to invite you to the symposium "Multiple Sclerosis Treatment Algorithm". This year the main topic is What if the prescribed DMT does not work?. During the symposium, we will discuss how to monitor treatment response in people with MS on high efficacy DMTs and what to do in case of a treatment failure. We expect your participation through clinical case presentations relevant to the appropriate topic and, as always, an interesting discussion.

The novelty this year are going to be two workshops: How to determine EDSS in the right way and How to interpret MRI in a person with suspected MS.

The main goal of the symposium is to provide the participants with theoretical and practical knowledge using evidence-based medicine, and clinical cases which will be discussed with MS experts.

Prof. Mario Habek, MD, PhD

Program

Topic 1.

- 9:30–9:45: Gregor Jakob Brecl: How to monitor treatment response in person with MS on high-efficacy DMT?
- 9:45–10:00: Jelena Drulović: Considerations in switching between high-efficacy DMTs
- 10:00–11:30: Case presentations
- 11:30–12:00: Coffee break
- 12:00–13:30: Case presentations
- 13:30–14:30: Lunch

Workshops

time

Group 1

Group 2

Group 3

Group 4

14:30-15:30

Mario Habek:

How to determine EDSS in the right way

Barbara Barun:

How to interpret MRI in a person with suspected MS

Tereza Gabelić:

How to determine EDSS in the right way

Ivan Adamec:

How to interpret MRI in a person with suspected MS

15:30-16:30

Tereza Gabelić:

How to interpret MRI in a person with suspected MS

Ivan Adamec:

How to determine EDSS in the right way

Mario Habek:

How to interpret MRI in a person with suspected MS

Barbara Barun:

How to determine EDSS in the right way
