Dear colleagues and friends,

it is our special honor and sincere pleasure to invite you and your colleagues to the Sixth Rijeka Forum of Neurodegenerative Diseases, on behalf of the Organizing Committee. The Forum is organized by the Clinic of Neurology CHC Rijeka, together with the Croatian Academy of Science and Arts and Croatian Medical Association.

The goal of this year's Forum is to present the latest developments and dilemmas in the field of neurodegenerative diseases, along with a special focus on the 30 years since the amyloid hypothesis, which is set by one of our lecturers Sir John Hardy. The lectures will also cover novelties in the field of neurodegenerative diseases, with the goal of improving daily clinical practice and scientific work. At the suggestion of the participants, we have extended the forum to three days, with the last day being dedicated to young neuroscientists and their research. We hope you that you will join us and enjoy exciting lectures in the field and that you will recommend this meeting to your colleagues.

On behalf of the Organizing Committee,

Asst. Prof. Vladimira Vuletić, MD, PhD
